

Cyber resilience is about staying ahead of the game. Are your people prepared to fight against ever-evolving threat landscape?

● WHAT WE OFFER

The security of your organization lies in the hands of your cyber soldiers. Trainings for the most elite special units, such as the Navy SEALs, involve routine, repetitiveness and realism. Do your cyber teams operate in the same manner?

We offer you a simulated cyber attack scenario based on the infrastructure composed of the most popular machines and systems used by companies worldwide. Assess how your team would handle an attack consisting of common real-world techniques employed by hackers. Theory alone is not enough – practical training with CDeX is essential.

● WHAT YOU GAIN

Check your cyber workforce readiness

Close the skill gap

Train as you fight

● YOUR 3 STEPS WITH CDeX

1. Assign the training to your team

Let the CDeX technology simulate a real-world attack within the safe and controlled environment.

2. Identify their current performance

Understanding the strengths and weaknesses of your team is the first step towards improving cyber resilience. Estimate and manage the risks. If your team scores more than 70% points, we will apply a 70% discount on the list price of our service. If not, let our CDeX specialists assist you in developing a customized training path for your cyber defenders.

3. Bring your cyber resilience to the next level

Enhance the competencies of your team members through additional simulations and prepare them to combat hackers. Ensure that they are ready when the storm hits. Track their growth over time.
